## JAARPROGRAM VIR DIE RES VAN 2016:

- 21 Mei 2016      **Vlakeskiet**, Kompetisieskiet met jaggewere.
- 18 Junie 2016      **Kremetart Versamelstuk Skietdag**
- 16 Julie 2016      **Bosveldskiet**, Kompetisieskiet met jaggewere.
- 21 Augustus 2016      **Sportskiet**: handwapens, haelgewere, .22 kompetisie, jaggewere tot 100 m  
**Versamelaars aktiwiteit**: Versamelaars bring haelgewere.
- 17 September 2016      **Prestige skiet**, Kompetisie skiet met jaggewere.

### **23 September 2016**      **Mandjiedans by Gholfklub Naboom.**

- 1ste Prys – 1 x Jong slag os of (R3,000-00 kontant)
- 2de Prys – 1 x Slag Skaap en 1 Slag boerbok of (R1,500-00 kontant)
- 3de Prys – 1 x Slag Vark of (R500-00 kontant)

- 15 Oktober 2016      **Sportskiet**: handwapens, haelgewere, .22 kompetisie, jaggewere tot 100 m  
**Versamelaars aktiwiteit**: Tema dag

- 18 November 2016      **Prysuitdeling**
- 19 November 2016      **Span skiet** (4 skuts per span – skryf eie span in) Skiet 9 rondtes per skut.

**BELANGRIK:** Alle skiet aktiwiteite vind te **MASADA SKIETBAAN** plaas vanaf 08h00 tot laaste inskrywing om 14h00. Tydens kompetisies mag net met jaggewere, en nie met skyfskietgewere, geskiet word nie. **VERSAMELAARS AKTIWITEITE** is van 10h00 tot 11h00 by die lapa. Bring versamelstuk/ke wat vir die dag geskeduleer is en kom wys en vertel. Versamelaars kan op Sportskiet dae, met versamelstukke kom skiet.

Let asb daarop dat die BWAV kantoor geskuif het na:

Vyfdelaan nr. 7 te Naboom Rekenmeesters.

Tel: 014 743 0667

Faks: 014 743 3071

### NUWE LEDE

**Baie welkom aan die volgende lede  
wat by ons aangesluit het:**

Jan Kruger – B012

Tobie Kritzinger – B058

Wynand Bekker – B066

Carel Krause – B073

Johann Nieuwoudt – B085

Frikkie Visser – B100

Johan Hoogenboezem – B145

Michelle Du Preez – B159

Brian Brooks – B193

Mokone Du Preez – B217

Pieter Swanepoel – B237

Piet Nel (Snr) – B252

Piet Nel (Jnr) – B270

Stiff Botha – B356

Johan Barnard – B359

Eben Oosthuizen – B361

### PROJEK – ADVERTENSIE BORDE:

Die advertensie bord projek vorder baie mooi en wil ons voorlopig dankie sê aan lede wat reeds positief gereageer het.

Ons sal ook bly wees indien u nie-lede en/of besighede sal werf om ons te ondersteun. Die koste vir 'n lid beloop R800-00 per jaar en vir 'n nie-lid R1,200-00 per jaar vir 'n tydperk van Drie jaar.

Skakel die BWAV kantoor vir al die inligting, besonderhede, voorskrifte en voorwaardes wat die hele projek behels. Baie dankie vir almal se ondersteuning en bydraes 😊

### BAAN OFFISIERE:

Ons het baanoffisiere in die Vereniging nodig wat ywerig sal werk en bereid sal wees om een Saterdag 'n maand op te offer om uit te help te Masada Skietbaan. Kontak die kantoor vir meer inligting by 014 743 0667 of epos na [bosveldwapenenammunisie@gmail.com](mailto:bosveldwapenenammunisie@gmail.com)

### VERSAMELAARS AKTIWITEITE

Versamelaars aktiwiteits-verslae, moet asb op datum gehou word.  
Verslae moet ingehandig word voor 30 November 2016 by die BWAV kantoor.

### TOEGEWYDE JAGTERS

Om Toegewyde Jagter Status te behou, moet die lid 'n opbetaalde lid van die BWAV bly, aan Drie aktiwiteite elke jaar deelneem en bewyse van jag geleenthede vir die jaar inhandig of bewyse van skiet byeenkomste by ander verenigings. Daar moet 'n Toegewyde Jagter Jaarverslag vorm voltooi word en terug besorg word aan die kantoor so spoedig moontlik asb. Toegewyde Jagters word herinner daaraan om wanneer hulle jag, die volgende dokumente te bewaar as bewys van jag. Dit word ingedien saam met u verslag aan die einde van die jaar:

\* Toestemming van die plaaseienaar:

\* Lisensie / Jagpermit

\* Vervoerpermit waar nodig

Stuur ook u jag foto aan. Ons bewonder dit graag met 'n bietjie jaloesie. Ons herinner al die Toegewyde Jagters om hul jaarverslae in te handig voor 30 November 2016.

### ADVERTENSIE SPASIE

Adverteer u jag geleentheid, wil u items verkoop of ruil, is u opsoek na daardie spesiale artikel? Maak gebruik van hierdie geleentheid om dit te adverteer. Die koste vir so 'n advertensie per blok van 10 x 8cm is R50.00 per plasing per uitgawe. Kontak gerus ons kantoor vir meer inligting. Instansies en nie lede van buite ons vereniging is ook welkom om van die aanbod gebruik te maak! Onthou hierdie advertensie verskyn ook op ons webblad [www.bwav.co.za](http://www.bwav.co.za) d.m.v. hierdie nuusbrieff.

### Lief en Leed

**Ons het met groot leedwese kennis geneem van die skielike heengaan van Dok Lappies Labuschagne.**

**Dok Lappies was 'n hoog gewaardeerde lid van hierdie vereniging en sal sy prysenswaardige insette, veral m.b.t. die Versamelaars afdeling, verseker gemis word.**

**Ons betuig graag ons innige meegevoel en simpatie met sy vrou, kinders, familie en vriende en bid hulle alle sterkte toe!**

### **Skiet aktiwiteite terugvoering:**

16 Januarie 2016 – Sportskiet  
Daar was 'n totaal van 58 skuts.

6 Februarie – Sportskiet  
Daar was 'n totaal van 79 skuts.

16 April – Sportskiet  
Daar was 'n totaal van 57 skuts.

Baie dankie vir almal se ondersteuning tydens ons skietaktiwiteite en die positiewe gesindheid wat elke lid steeds toon. Dit word baie waardeer en hoog op prys gestel.

Sien julle by die volgende skiet ☺

### Vlakte skiet – 21 Mei 2016:

**Groot kompetisie skiet met jaggewere word gehou op 21 Mei 2016.**

**Bring jul families en vriende om saam ons die dag te kom geniet en te sien hoeveel pret die BWAV lede kan hê, veral tydens ons kompetisie skiet dae!**

### 'n Stukkie geskiedenis oor gewere:

#### *19th century*

"Premier Consul" model [flintlock carbine](#) made by [Jean Lepage](#) and named for the [First Consul Napoléon Bonaparte](#), circa 1800;

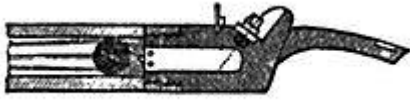

Rifling of the Lepage carbine.

During the [Napoleonic Wars](#) the British army created several experimental units known as "Rifles", armed with the [Baker rifle](#). These Rifle Regiments were deployed as skirmishers during the Peninsular war in Spain and Portugal, and were more effective than skirmishers armed with muskets due to their accuracy and long range.

#### **Muzzle-loading**

*Main article:* [Muzzle-loading rifle](#)

Gradually, rifles appeared with cylindrical barrels cut with helical grooves, the surfaces between the grooves being "lands". The innovation shortly preceded the mass adoption of [breech-loading weapons](#), as it was not practical to push an overbore bullet down through a rifled barrel, only to then (try to) fire it back out. The dirt and grime from prior shots was pushed down ahead of a tight bullet or ball (which may have been a loose fit in the clean barrel before the first shot), and, of course, loading was far more difficult, as the lead had to be deformed to go down in the first place, reducing the accuracy due to deformation. Several systems were tried to deal with the problem, usually by resorting to an under-bore bullet that expanded upon firing.

The method developed by [Delvigne](#) for his rifles, with the lead bullet being supported by a wooden sabot at its base.

The original muzzle-loading rifle, with a closely fitting ball to take the [rifling](#) grooves, was loaded with difficulty, particularly when foul, and for this reason was not generally used for military purposes. Even with the advent of rifling the bullet itself didn't change, but was wrapped in a greased, cloth patch to grip the rifling grooves.

The first half of the 19th century saw a distinct change in the shape and function of the bullet. In 1826 [Delvigne](#), a French [infantry](#) officer, invented a breech with abrupt shoulders on which a spherical bullet was rammed down until it caught the rifling grooves. Delvigne's method, however, deformed the bullet and was inaccurate.

Soon after, the [Carabine à tige](#) was invented by [Louis-Etienne de Thouvenin](#), which provided for a stem at the bottom at the barrel that would deform and expand the base of the bullet when rammed, therefore enabling accurate contact with the rifling. However, the area around the stem would clog and get dirty easily.

---

## 20th century

Czechoslovak rifle vz. 24

The [Russo-Japanese War](#) of 1904-1905 was the first modern war of the 20th century. Military observers from Great Britain, Germany, France, and the United States witnessed first-hand the first major conflict fought with high velocity bolt-action rifles firing [smokeless powder](#) on a massive scale. The [Battle of Mukden](#) fought in 1905 consisted of nearly 343,000 Russian troops against over 281,000 Japanese troops. The Russian [Mosin-Nagant](#) Model 1891 in 7.62mm was pitted against the Japanese [Arisaka](#) Type 30 bolt-action rifle in 6.5mm, each had velocities well over the 19th century black powder velocities of under 2,000 feet per second (610 m/s).

Until the early 20th century rifles tended to be very long; an 1890 [Martini-Henry](#) was almost 2 m (6 ft.) in length with a fixed [bayonet](#). The demand for more

compact weapons for [cavalrymen](#) led to the [carbine](#), or shortened rifle.

The advent of massed, rapid firepower of the [machine gun](#), [submachine gun](#) and the rifled [artillery](#) piece was so quick as to outstrip the development of any way to attack a [trench](#) defended by riflemen and machine gunners. The carnage of [World War I](#) was perhaps the greatest vindication and vilification of the rifle as a military weapon.

Modern hunting rifle

During and after [World War II](#) it became accepted that most infantry engagements occur at ranges of less than 300 m; the range and power of the large [battle rifles](#) was "overkill"; and the weapons were heavier than the ideal. This led to Germany's development of the [7.92x33mm Kurz](#) (short) round, the [Mk42](#), and ultimately, the assault rifle. Today, an infantryman's rifle is optimized for ranges of 300 m or less, and soldiers are trained to deliver individual rounds or bursts of fire within these distances. Typically, the application of accurate, long-range fire is the domain of the [marksman](#) and the [sniper](#) in warfare, and of enthusiastic target shooters in peacetime. The modern [marksman rifle](#) and [sniper rifle](#) are usually capable of accuracy better than 0.3 [mrad](#) at 100 yards (1 [arcminute](#)).

[Blaser R8](#) Professional

---

## 3D printed rifle

Main article: [Grizzly \(.22-caliber rifle\)](#)

The [Grizzly](#) is a 3D printed .22-caliber rifle created around August 2013. It was created using a [Stratasys](#) Dimension 1200es printer. It was created by a Canadian only known by the pseudonym "Matthew" who told the *The Verge* that he is in his late 20s, and his main job is making tools for the construction industry.

The original Grizzly fired a single shot before breaking. Grizzly 2.0 fired fourteen bullets before getting damaged due to the strain. According to the [Daily Mail](#), the Grizzly 2.0 performed so well that the inventor "Matthew" was able to put the rifle to his shoulder, pressed against his cheek, and shoot off three rounds without hurting himself.
